WORK EXPERIENCE

Software Development Engineer in Test (SDET) May 2026 – Present
Octave (Hexagon AB) • Internship (Specialization) Madison, AL

- Design and implement automated unit tests in C# to validate Smart 3D module behavior and improve software reliability and test coverage
- Expand test coverage through structured automation strategies and AI-assisted test generation, strengthening consistency and scalability of validation efforts
- Analyze test results and trace defects to root cause, improving code quality and system robustness across releases
- Collaborate within an Agile development team, translating requirements into testable, verifiable outcomes aligned with production behavior
- Develop, execute, and document unit, integration, and regression tests, ensuring traceability, reproducibility, and continuous improvement of testing practices

Systems Engineer Jan 2022 – Present
SafeHug LLC Madison, AL

- Served as the primary technical point of contact, ensuring traceability between requirements and system behavior
- Owned verification and validation of a production web system supporting a patented medical safety device, ensuring alignment with real-world safety intent
- Validated end-to-end system functionality, performance, and operational reliability, translating stakeholder intent into verifiable technical outcomes
- Led change management and continuous monitoring, identifying risks, anomalies, and emerging issues to preserve system stability, security, and operability

Software Engineering Contractor May 2025 – Aug 2025
Tektonux LLC Huntsville, AL

- Supported automated test design and execution (Playwright) to validate system behavior against visual and functional requirements
- Produced technical documentation for C# unit, end-to-end, and Storybook tests, enabling efficient onboarding and test adoption
- Tested terrain server functionality using GeoTIFF DEMs and Cesium, ensuring replicability across environments
- Implemented user interfaces in TypeScript, CSS, and HTML, ensuring accuracy across development stages

Test Engineer Dec 2022
Independent Client (E-Commerce) Dallas, TX

- Validated and released a customer-facing production web system, enabling immediate deployment and revenue impact
- Collaborated directly with the business owner, confirming requirements and ensuring delivered behavior matched business expectations
- Tested system behavior, usability, and visual correctness to ensure production readiness prior to launch

EDUCATION

Bachelor of Science in Computer Science
The University of Alabama in Huntsville Huntsville, AL

- **Summa Cum Laude**
- **Minor:** Mathematical Sciences | **Concentration:** Artificial Intelligence and Data Science

Associate of Science in Computer Science
Calhoun Community College Decatur, AL

- **Summa Cum Laude | Top Ten Student Award**
- **Short-Term Certificate in Programming Essentials | Short-Term Certificate in Computer Science Essentials**

CERTIFICATIONS, SKILLS & TECHNOLOGIES

- **Testing & Automation:** Unit Testing (C#), Test Automation, Integration & End-to-End Testing, Regression Testing, Playwright, AI-Assisted Test Generation
- **Systems & Software:** Verification & Validation (V&V), Requirements Traceability, System Testing, Root Cause Analysis, C#, Python, C++, TypeScript
- **Tools & Practices:** Git, Agile (Scrum), Technical Documentation, Test Case Design, Cross-Functional Collaboration
- **Certifications:** Microsoft Office Specialist (MOS): Word, Excel, PowerPoint
