WORK EXPERIENCE

Systems Engineer

SafeHug LLC

Jan 2022 – Present

Madison, AL

- Served as the primary technical point of contact, ensuring traceability between requirements and system behavior
- Owned verification and validation of a production web system supporting a patented medical safety device, ensuring alignment with real-world safety intent
- Validated end-to-end system functionality, performance, and operational reliability, translating stakeholder intent into verifiable technical outcomes
- Led change management and continuous monitoring, identifying risks, anomalies, and emerging issues to preserve system stability, security, and operability

Software Development Engineer in Test (SDET)

Octave Intelligence plc • Internship

May 2026 – Present

Madison, AL

- Designed and implemented automated unit tests in C# for Octave's flagship engineering design platform, Smart 3D, validating module behavior to improve software reliability and test coverage
- Expanded test coverage through structured automation strategies and AI-assisted test generation, strengthening consistency and scalability of validation efforts
- Analyzed test results and traced defects to root cause, improving code quality and system robustness across releases
- Developed, executed, and documented unit, integration, and regression tests, ensuring traceability, reproducibility, and continuous improvement of testing practices

Software Engineering Contractor

Tektonux LLC

May 2025 – Aug 2025

Huntsville, AL

- Supported automated test design and execution (Playwright) to validate system behavior against visual and functional requirements
- Produced technical documentation for C# unit, end-to-end, and Storybook tests, enabling efficient onboarding and test adoption
- Tested terrain server functionality using GeoTIFF DEMs and Cesium, ensuring replicability across environments
- Implemented user interfaces in TypeScript, CSS, and HTML, ensuring accuracy across development stages

Test Engineer

Independent Client (E-Commerce)

Dec 2022

Dallas, TX

- Validated and released a customer-facing production web system, enabling immediate deployment and revenue impact
- Collaborated directly with the business owner, confirming requirements and ensuring delivered behavior matched business expectations
- Tested system behavior, usability, and visual correctness to ensure production readiness prior to launch

EDUCATION

Bachelor of Science in Computer Science

The University of Alabama in Huntsville

Huntsville, AL

- **Summa Cum Laude**
- **Minor:** Mathematical Sciences | **Concentration:** Artificial Intelligence and Data Science

Associate of Science in Computer Science

Calhoun Community College

Decatur, AL

- **Summa Cum Laude** | **Top Ten Student Award**
- **Short-Term Certificate in Programming Essentials** | **Short-Term Certificate in Computer Science Essentials**

CERTIFICATIONS, SKILLS & TECHNOLOGIES

- **Systems & Software:** Verification & Validation (V&V), Requirements Traceability, System Testing, Root Cause Analysis, C#, Python, C++, TypeScript
- **Testing & Automation:** Unit Testing (C#), Test Automation, Integration & End-to-End Testing, Regression Testing, Playwright, AI-Assisted Test Generation
- **Tools & Practices:** Git, Agile (Scrum), Technical Documentation, Test Case Design, Cross-Functional Collaboration
- **Certifications:** Microsoft Office Specialist (MOS): Word, Excel, PowerPoint
